

Environmental Policy

On the basic concept of global environmental conservation and parallel standing of business activity, our company will endeavor to contribute to the local society, through mold maintenance technology.

1. We will proceed resource saving, recycling, and reduction of wastes in all the business.
2. We make efforts to develop and provide environmentally friendly products with long life cycle of production line by reasonable methods.
3. By setting environmental objective, we endeavor to attain them and continually improve them.
4. We obey related environmental law / regulations and make effort to fulfill other requirements to which our company agreed for the prevention of contaminations
5. This policy should be widely known to all the staffs and opened outside the company.
