## **Notice about CLIPIKA ACE 107 & 107HG**

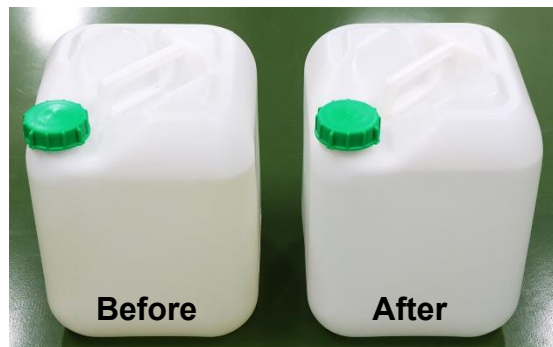

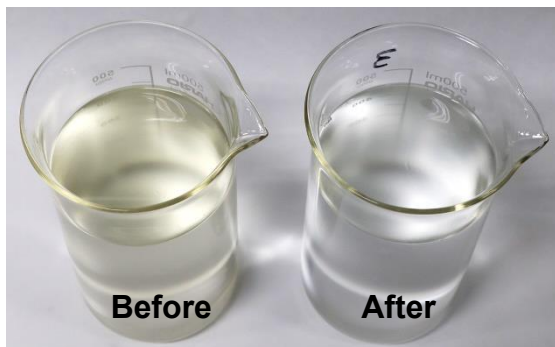

### **Dear Valued Customers**

This is to inform you that we have changed our suppliers of some materials for CLIPIKA ACE 107 and 107HG to stabilize the procurement considering the recent world situation. Accordingly, the degree of purification has been improved and the transparency of the both cleaning solutions has become higher.

The ability hasn't been changed, and there is no problem if these solutions mix with the existing ones. Please use them at ease.

Furthermore, there aren't any changes to the SDS and the methods for the handling, management, and disposal.

We would appreciate your continued support.
